

DAVID BLESSED MORTAGBE

Systems Administrator | Data Analytics | Customer Success

+233 244 754 988 | mortagbedavid@gmail.com | [LinkedIn](#) | Accra, Ghana

PROFESSIONAL SUMMARY

Data-enabled Systems Administrator and Customer Success professional with over 3 years of experience across digital, financial services, and operations environments. Specializes in utilizing Excel, SQL, Python, and Power BI to support data-driven business decisions, optimize system operations, and improve client satisfaction. Proven track record of maintaining 90% platform uptime, sustaining 90–95% satisfaction rates, and implementing AI-augmented diagnostic workflows to accelerate technical resolution speeds. Graduate of the Generation Ghana Data Analytics Upskilling Programme, with practical experience in enterprise database management and workforce intelligence analytics.

CORE SKILLS

- **Data Tools:** Excel, SQL, Python, Power BI, MySQL, Google Workspace
- **Analysis & Engineering:** Data cleaning, trend analysis, database design, relational modeling, performance reporting
- **Operations & Support:** Systems administration, network troubleshooting, CRM/helpdesk management, AI-augmented workflows, KYC awareness
- **Business Acumen:** Decision support, stakeholder communication, customer success, complaint resolution & escalation handling

PROFESSIONAL EXPERIENCE

System Administrator – Clozar Group, Lashibi

May 2026 – Present

- Maintained a 100% zero-error record across web-based booking transactions by validating delivery and operational data prior to system entry.
- Achieved 90% platform uptime by proactively monitoring system health, diagnosing technical faults, and coordinating swift resolutions with engineering teams.
- Extended IT device and network infrastructure operational life by 80% through systematic security patching, software updates, and scheduled maintenance.
- Accelerated technical issue resolution speed by 95% by integrating AI tools into key diagnostic troubleshooting workflows.

PAST EXPERIENCES

Customer Success & Operations Executive – Clozar, Lashibi

Dec 2025 – Apr 2026

- Achieved an average first response time under 1 hour while maintaining a 95% non-escalation rate across high-volume client inquiries.
- Reduced average case resolution time by 25% through proactive service monitoring and early identification of delivery bottlenecks.
- Lowered cross-functional escalations by 15% through structured coordination with product development and operations teams.

Customer Support Lead – Posadabelle, Accra

Jan 2025 – Nov 2025

- Sustained a 95% same-day response rate while managing over 30 inbound customer inquiries daily across WhatsApp Business and Instagram.

- Attained a 90% customer satisfaction rating by owning end-to-end complaint resolution and tracking cases to completion.
 - Built a zero-error customer tracking database in Excel, providing leadership with an audit-ready source for performance reporting and trend analysis.
- IT Support Technician (National Service) – KNUST** **Oct 2023 – Nov 2024**
- Resolved 30+ weekly technical requests across phone, messaging, and walk-in channels, securing same-day resolution for 85% of support tickets.
 - Restructured ticket records and user support documentation, increasing reporting efficiency by 20% and reducing repeat support requests.

DATA APPLICATION PROJECTS

- Roblox Africa Workforce Intelligence & Performance Analysis** **Generation Ghana
Capstone**
- Evaluated cross-functional headcount, performance, and financial metrics across 7 interconnected operational datasets representing over 30,000 employees.
 - Engineered a relational MySQL database schema with full referential integrity, executing automated data ingestion and cleaning pipelines via Python (pandas) and SQL.
 - Designed a 5-page interactive Power BI dashboard powered by custom SQL analytical views to address targeted executive decision-making criteria.
 - Uncovered a major variance between department-level payroll expenditures and actual budgeted totals, flagging the risk to executive leadership for strategic audit.
- Marketplace Application Optimization & Data Quality Audit | Excel, SQL** **Clozar Internal Project**
- Audited pre-launch product and vendor master data to eliminate inconsistencies, establishing core KPIs for user activation and engagement tracking.
 - Collaborated with product managers and engineers to refine application features using customer usage metrics, resulting in improved data reliability and user experience.

EDUCATION, PROFESSIONAL DEVELOPMENT & CERTIFICATIONS

- **Data Analytics Upskilling Programme** – Generation Ghana (2026)
- **Networking & Cybersecurity Bootcamp Certificate** – UITS, KNUST (2024)
- **BSc. Agriculture** – Kwame Nkrumah University of Science and Technology (KNUST) (2019 – 2023)
- **Professional Certifications:** Introduction to Cybersecurity (Cisco, 2024) | Risk and Security Management (Alison, 2024) | AI Career Essentials (ALX, 2024) | IT Support (Alison, 2024)

KEY VALUE PROPOSITION

- **Data Visibility & Reporting:** Adept at building interactive Power BI dashboards, writing analytical SQL views, and structuring clean data pipelines that reduce manual reporting overhead and drive business clarity.
- **Operational Systems Reliability:** Proven track record of maintaining zero-error transaction records, sustaining 90% platform availability, and delivering audit-ready data models.
- **Efficiency & Customer Satisfaction:** Combines Python, SQL, and AI-augmented diagnostic workflows to streamline operations, cut incident resolution times, and sustain 90–95% client satisfaction rates.
